

**ROLMAN
WORLD**

**THE WORLD
IN MOTION**

Made for Motion

www.rolman.com

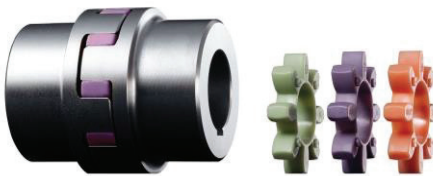

It all began back in the 1950s. BoWex®, the first curved tooth coupling to combine steel and plastic, was developed at KTR's headquarters in Rheine, Germany. This was shortly followed by ROTEX®, the first brand coupling to become a DIN standard. These successes fuel the imagination. And you can build on them – which is exactly what KTR does.

With more than 50 years experience in power transmission, KTR is a leading manufacturer of high-quality drive and brake components, as well as hydraulic components, offering customised solutions to industry all over the world including Oil & Gas, Petrochemical, Steel, Marine, Machine Tools, Material Handling & Mining, and more.

KTR 's produce several million couplings a year, have in excess of 3,500 standard products, and produce more than 10,000 customised products a year - covering torque up to 1.000.000 Nm and some couplings with weight upwards of 2 ton.

We move the world: KTR

Flexible jaw pin & bush couplings

ROTEX®
POLY

POLY-NORM®
REVOLUX®

Gear couplings

BoWex®

All Steel Gear couplings

GEARex®

Steel Lamina couplings

RIGIFLEX®
RADEX-N®

Flange couplings

BoWex® FLE-PA
BoWex® – ELASTIC
MONOPLASTIC®

Fluid couplings

Inner wheel drive
Outer wheel drive

Magnetic couplings

MINEX®-S

Backlash-free servo couplings

ROTEX®-GS®
TOOLFLEX®
RADEX-NC®
COUNTEx®
