**THE WORLD
IN MOTION**

www.rolman.com

TRW Automotive, with its global headquarters in Livonia, Michigan, is a primary developer and producer of active and passive safety systems and ranks among the world's leading automotive suppliers. It is one of the largest suppliers in the industry, reporting 2014 sales of \$17.5 billion. As the global leader in automotive safety, TRW serves all major vehicle manufacturers worldwide with an established footprint that includes more than 68,000 employees working at 190 facilities in 27 countries. TRW maintains 21 technical centers and 13 test tracks in vital markets around the world.

TRW, the global leader in chassis systems - TRW, the OE expert in braking and steering and suspension systems completed its Corner Module portfolio with the acquisition in 2010 of ArvinMeritor's European shock absorber business. This includes the famous Gabriel brand name in Europe and a manufacturing facility in Bonneval, France.

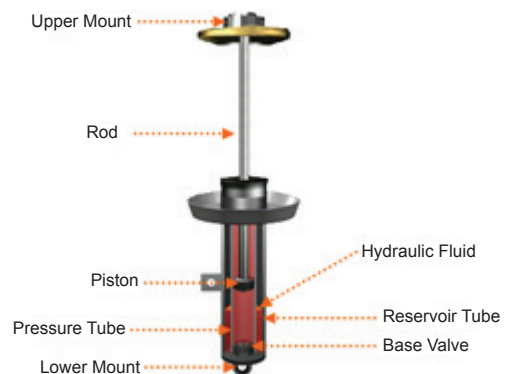

The term Corner Module explains TRW's field of expertise within the aftermarket and reflects our OEM engineering pedigree, showcasing the technologies which are a logical fit and which TRW can supply. TRW's Corner Module offer is connected to the corner of the vehicle, and includes everything necessary for a safer drive by controlling the transmission of power to the road whilst providing safety to the car, other road users and pedestrians. TRW is unique in the fact it is the only provider in the market of all relevant Corner Module technologies and parts under one brand.

Tested and trusted

TRW's Shock Absorber programme meets stringent quality standards offering OE and OES matching quality ensuring superior performance, ride and control in all driving conditions for any type of vehicle; passenger cars, vans or 4x4s. Our shocks are tested on the bench, on the track and on the road for maximum safety confidence. Testing methods include:

- Low and high velocity tests, where the damping settings and associated ride comfort are regulated.
- Endurance tests, to check the shock absorber for durability and behaviour during extensive period of operation.
- Each part is tested on the bench, 100% damping and dimensions are verified.
- All new part numbers are tuned to optimum handling performance in the course of road tests.
- Packaged in pairs for maximum safety.

TRW, a key player around the world

- In Europe, within 2 years, TRW has become the 2nd largest force in the marketplace reaching 90% coverage for the vehicle parc.
- In Malaysia, we distribute over 420 part numbers giving TRW the widest range available in the market.
- In India, we distribute over 115 part numbers giving us the widest range on imported cars.
- In 2013, TRW completed its Corner Module Portfolio in China by launching 110 part numbers for European Applications.
